

What is claimed is:

1. An oral-product container, comprising:
 - a) a plurality of breath fresheners contained therein for breath
5 freshening purposes; and
 - b) a mirror for visage freshening purposes.
2. The container of claim 1, wherein said mirror is on an interior of said
10 container when said container is closed.
3. The container of claim 1, wherein said mirror is on an exterior of said
container when said container is closed.
4. The container of claim 1, wherein said breath fresheners include at
15 least flavor from the group consisting of: peppermint; spearmint; other
mint flavors; wintergreen; cinnamon; licorice; citric flavors; sour flavors;
and herbal or spice flavors.
5. A method of distributing containers of claim 1, comprising:
 - a) filling a plurality of said containers in a packaging container;
20 b) transporting the filled packaging container to a retail center.
6. A method of freshening an individual, comprising:
 - a) providing the individual with a container having a plurality of breath
25 fresheners contained therein and a mirror;
 - b) having the individual place at least one of said breath fresheners in
the individual's mouth for breath freshening purposes; and
 - c) having the individual view himself or herself in said mirror for visage
freshening purposes.
30
7. The method of claim 6, wherein said visage freshening purposes
includes determining whether the individual's face needs freshening.

8. The method of claim 6, wherein said visage freshening purposes includes freshening the individual's face with cosmetic products or devices.

5 9. An oral-product container, comprising:

a) a plurality of breath fresheners contained therein for breath freshening purposes;

b) a mirror for visage freshening purposes;

c) a mirror cover such that the mirror can be protected from external environmental factors under the cover; and

10 d) wherein said mirror is isolated from the container interior such as to be separate from the oral product therein.

10. An oral-product container, comprising:

15 a) a container body;

b) a laterally sliding lid on said container body;

c) a mirror beneath said laterally sliding lid.

11. The oral product container of claim 10, wherein said container is

20 configured to expose both said mirror and an oral-product dispensing opening by lateral motion of said lid.

12. The oral product container of claim 11, wherein said oral-product dispensing opening is on a common wall with said mirror.

25 13. The oral product container of claim 10, wherein said oral-product dispensing opening is on a common wall with said mirror.

14. The oral product container of claim 13, wherein said common wall is in substantially a plane generally parallel to said lid.

30 15. A method for enhancing personal make-up or make-over treatments, comprising:

a) providing a container having a plurality of mints therein and a mirror,

said mirror being configured to enable an individual to perform personal make-up or make-over treatment;

b) suggesting that an individual to eat the mints within the container;

and

5 c) suggesting that an individual perform personal make-up or make-over treatment using the mirror in the container.

10 16. The method of claim 15, further including suggesting that an individual eat mints within the container while concurrently performing personal make-up or make-over treatment using the mirror in the container.

17. An oral-product container, comprising:

a) a plurality of breath fresheners contained therein for breath freshening purposes;

15 b) a mirror for visage freshening purposes; and

c) a lid for covering said mirror, said lid being mounted on said container in a manner to move relative to the mirror.

20 18. The container of claim 17, wherein said container includes a dispensing opening configured to dispense a few breath fresheners at a time.

25 19. The container of claim 17, wherein said container includes a dispensing opening configured to have an area less than about 10 times the size of said breath fresheners.

30 20. The container of claim 17, wherein said container includes a dispensing opening configured to have an area less than about 5 times the size of said breath fresheners.

21. The container of claim 17, wherein said mirror is supported upon an insert within said container.

22. The container of claim 17, wherein said mirror is supported upon a wall within said container that is not an external wall of said container.

23. The container of claim 22, wherein said mirror is supported upon an insert within said container.

24. The container of claim 22, wherein said mirror is located beneath said lid when said lid is in a closed state.

25. The container of claim 24, wherein said lid is configured to move between a closed state in which said lid obstructs both said mirror and a dispensing opening and an open state in which said lid exposes both said mirror and said dispensing opening.

26. An oral-product container, comprising:

- a) a plurality of breath fresheners contained therein for breath freshening purposes;
- b) a mirror for visage freshening purposes; and
- c) a lid for covering said mirror in a closed state and for exposing said mirror in an open state;
- d) a product dispensing opening in said container, wherein said mirror is fixedly positioned with respect to said product dispensing opening so as not to move relative thereto.

27. An oral-product container assembly, comprising:

- a) a plurality of breath fresheners contained therein for breath freshening purposes;
- b) a mirror for visage freshening purposes;
- c) a lid for covering said mirror in a closed state and for exposing said mirror in an open state;
- d) a mirror-display component to enhance consumer recognition of a mirror inside of the container during a closed state of the container.

28. The container assembly of claim 27, wherein said mirror-display component includes a through-hole or transparent window through which a consumer can visually observe at least a portion of the mirror.

5 29. The container assembly of claim 27, wherein said mirror-display component includes a generally reflective element located on an exterior surface of the container.

10 30. The container assembly of claim 29, further including indicia upon said container suggesting that the presence of a mirror inside the container, said indicia being proximate said generally reflective element.

15 31. The container assembly of claim 27, wherein said mirror-display component includes a sample support upon which a sample container is displayed in an open state with a similar mirror exposed.

20 32. The container assembly of claim 27, wherein said assembly includes a rack for holding a plurality of containers, and said sample container is mounted via said sample support upon said rack.

33. The container assembly of claim 32, wherein said sample support is pivotally mounted upon said rack so as to be pivoted downward during shipping.

25 34. An oral-product container assembly, comprising:
a) a plurality of breath fresheners contained therein for breath freshening purposes;
b) a mirror for visage freshening purposes;
c) a lid for covering said mirror in a closed state and for exposing said
30 mirror in an open state;
d) wherein said container has a proportional size to dimensions including a height of between about 3/8 to 5/8 inches, a width of between about 1 and 1/8 inches to 1 and 1/2 inches, and a length of between about 3 inches to 3 and 1/4 inches.

35. The oral product container assembly of claim 34, wherein said mirror has proportional size to dimensions including a width of about 2 and 1/8 inches to 2 and 3/8 inches and a width of about 7/8 inches to 1 and 1/8 inches.

36. An oral-product container assembly, comprising:

- a) a plurality of breath fresheners contained therein for breath freshening purposes;
- b) a mirror for visage freshening purposes;
- c) a lid for covering said mirror in a closed state and for exposing said mirror in an open state;
- d) wherein a height of said container is less than $\frac{1}{2}$ as long as a width of said container, and wherein said width of said container is less than $\frac{1}{2}$ as long as a length of said container.

37. The oral-product container assembly of claim 36, wherein said oral-product container assembly is dimensioned so as to have a height, a width and a length substantially in proportion to that shown in FIGS. 10-18.
